

VENUS PRINTING COMPANY
GSTIN: 33AFKPG7417C1ZT

ABOUT US

A printing and packaging company in Chennai, with 37 years of experience started with a noble intention of providing good quality printing and packaging solution in Chennai to each of its customers, covering all their necessary requirements. Today we provide printing solutions to a number of magazine suppliers, publishers and also to Tamil Nadu Text Book Corporation. We also provide complete packaging solution to few exporters and other local manufacturers.

COMPANY OVERVIEW

Venus Printing Company was established in the year 1985 as a proprietrix firm in the name of **Mrs. A.G.M.Gomathi**, w/o **A.G.Mathivanan**. Venus is a sister concern of **Ram Paper Varnishing Works** which was started in the year 1977 by **Mr. A.G.Mathivanan** which is a well reputed printing and varnishing company (water and chemical based coating). Venus was initially started as a printing ink manufacturing company, soon it ventured into Sheetfed-Offset 4 color printing (large size machines of size 36x48 inches) in the year 1986 based on market analysis and other references.

Later in the year 1989 Venus ventured into Web-Offset 8 color printing for printing government text books and magazines and also started its own coating business, water and chemical-based coating such as UV, Matt and Aqua (glossy shine on Duplex boards). Binding unit was also later developed around the same year, for composing and finishing books and magazines.

The company is currently being managed by 3 managing directors – **Mr. A.G. Mathivanan** – who handles sales and marketing, **Mr. Ram Vignesh** – (S/o A.G. Mathivanan) – who handles production and **Mr. Harshavaradhan** (grandson of A.G. Mathivanan) – who handles quality, with a goal to full-fill customers requirements in every aspect.

In 2020 the company has ventured into corrugated boxes with a aim of full-filling the packaging needs of its existing clients. The company mainly handles export orders with quality as its main priority. Currently the company is venturing into UV printing for high quality mono cartons.

Venus Printing Company is part of AGMR group of companies handled by the same 3 managing directors.

52inches Double profile fingerless corrugation machine – E and C flute

Servo based sheet cutter

100- and 80-inches pasting machine

Semi auto thin blade for creasing and side trimming

Printer-Slotter – Single color flexo printing with RS4 semiautomatic

41x56 platen die punch

Semi auto flap pasting machine

Stitching machine

Pressing machine

Manual slotter for partition boxes

PRINTING SERVICES

WEB-OFFSET PRINTING

8 (4+4) Color printing can be done back-to-back (Front and back) on a paper that is fed via reel or web format; the printed sheet will get cut into a 16 pages booklet which can then be composed to form a book. Applicable for books and magazines.

SHEETFED-OFFSET PRINTING

4 colors or 6 colors printing can be done on paper or duplex boards, the paper is then folded using our folding machines to form a booklet which is then composed to form a book in the binding section. Applicable for books, magazines, calendars, leaflets, book wrappers, and packaging mono-cartons.

BINDING

The books being printed via Web Offset and Sheetfed are then taken for composing to form a book. The booklets that are printed along with the wrappers of magazines or books are then glued or stitched and then trimmed to form a complete book.

MAGAZINES

COATING & LAMINATION

WATER AND CHEMICAL BASED COATING

Pharmaceutical boxes, food boxes, cosmetic boxes, etc all require some kind of coating on it to resist fingerprints and other impurities, these coatings are classified into 4 categories – Aqua Water based (Gloss mild) for products requiring high shine, Aqua – Water based (Matte) for products that require minimum shine but maintains a high degree of color intensity, UV – Chemical based (High gloss) for products that require high shine, Food grade coating for products that is used to preserve food items.

For products that require maximum level of gloss or matte finish at the same time requiring resistance against water (to a considerable level) – lamination is done. Lamination is basically a thin sheet of transparent film that comes in a choice of finish namely Glossy and Matte, these are adhered to the printed duplex sheets.

MET PET lamination can also be done on duplex sheets which can later be used for UV printing.

MET PET stands for Metalized Polyethylene Terephthalate film, these are metalized sheets that can be adhered to duplex sheets.

PACKAGING SERVICES

CORRUGATED ROLLS AND SHEETS

For clients that require just the conversion of kraft into 2 ply, and also for clients that require 2 ply corrugated sheets of specific sizes.

CORRUGATED BOXES

We offer both C and E flutes. Master cartons and other cartons that come on the exterior comes with C flute. Inner cartons and other cartons that holds the product directly comes with E flute. Sizes of the boxes can be customized according to requirements and the specification of the sheets also can be customized such as GSM, BF of the kraft as well as duplex boards to suit the clients need accordingly. Further 4 color or 6 color printing can be done on the duplex boards and made into customized boxes with lamination or other types of coatings as well. For clients requiring printing of single color on kraft (Brown) boxes we do offer flexo printing.

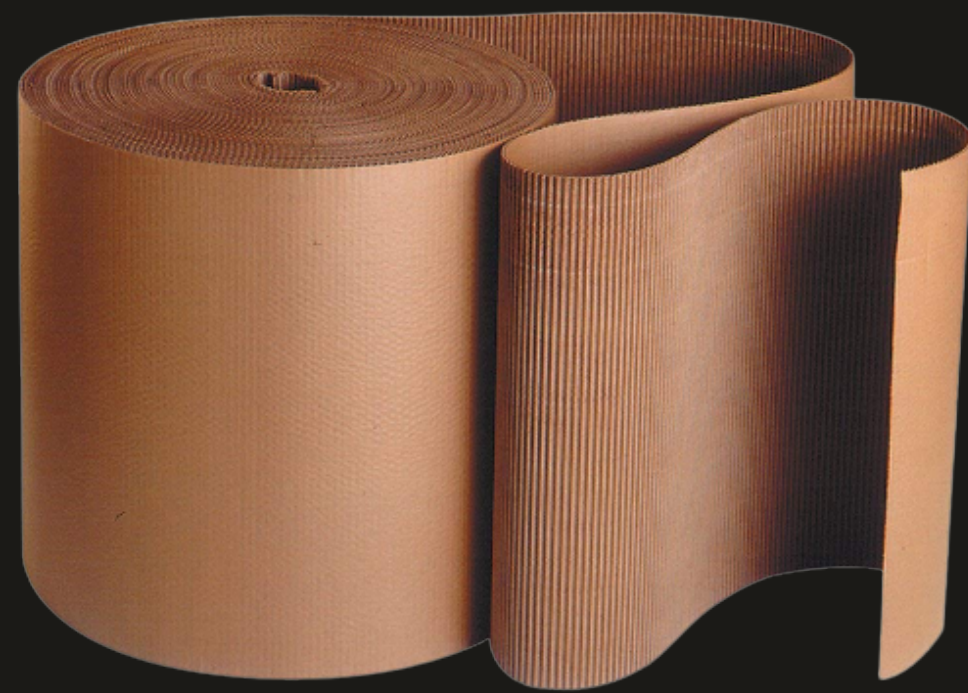

DIE CUT BOXES

Clients that require a specific style of box, with different openings or designs can be customized via die. These are made exclusively for the clients to accommodate their needs. All above mentioned printing, lamination or coating can be accommodated on these boxes as well.

PASTING OR STITCHING

Depending on the boxes and clients requirement, the boxes can either be stitched or glued for completion. Gluing gives a more premium feel, but compromises on durability, heavy duty boxes that hold large or heavy products cannot be glued. Stitching on the other hand provides a standard feel to the box, can accommodate heavy duty products, the strapping pins can also be given as rust free.
